Y21-1 | complete candidate chemical graph

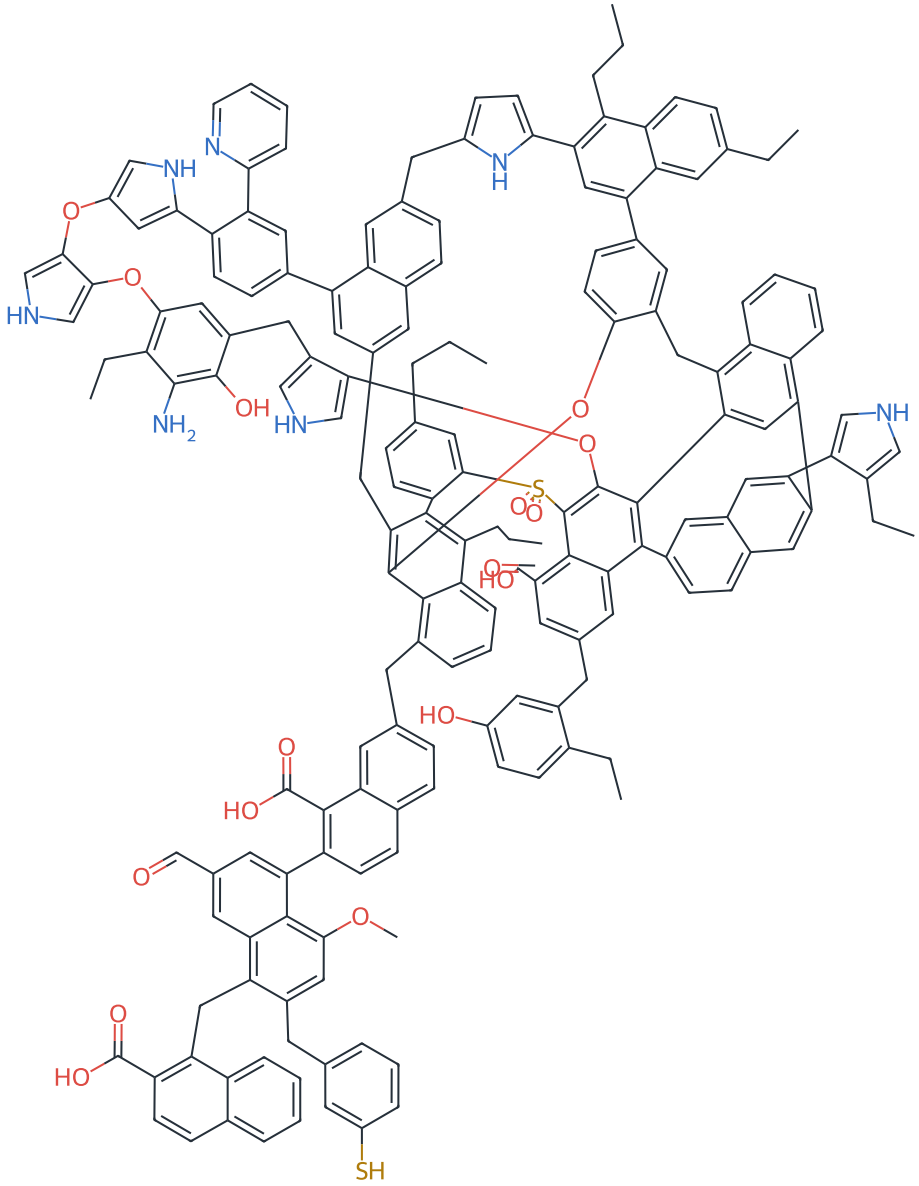

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-2 | complete candidate chemical graph

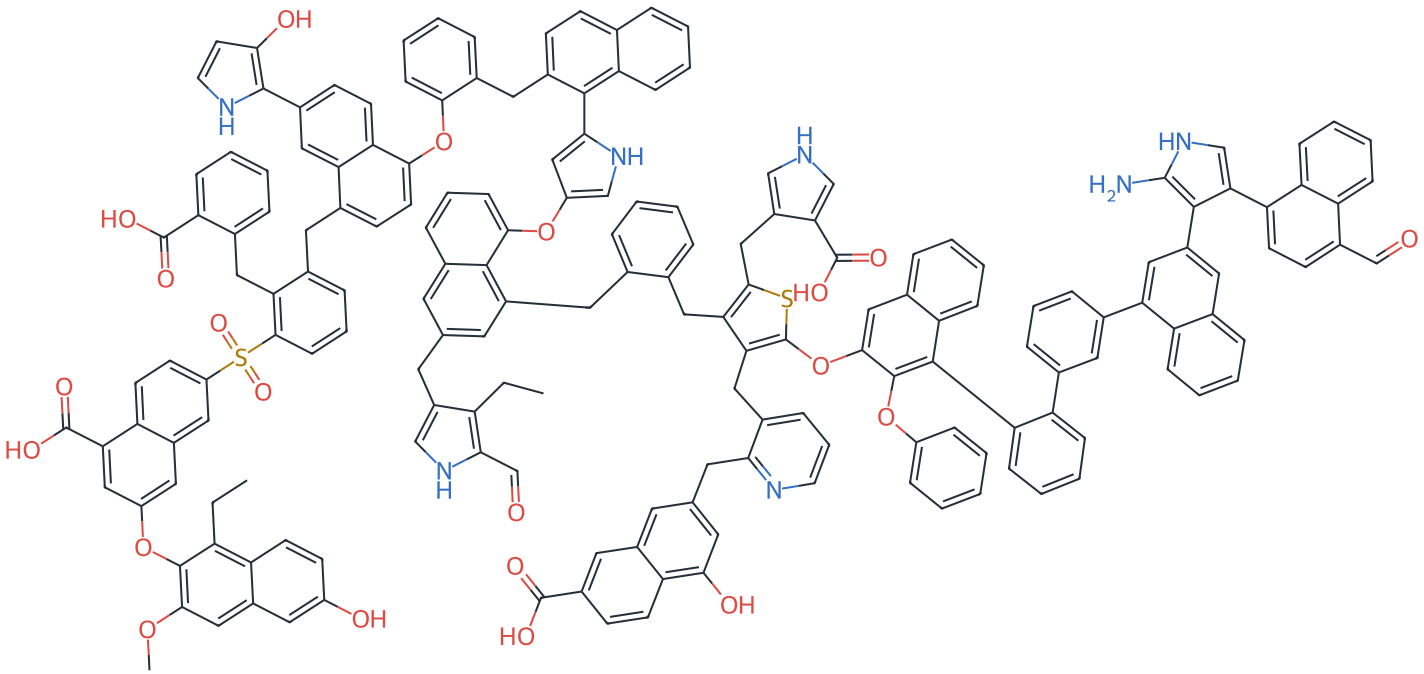

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-3 | complete candidate chemical graph

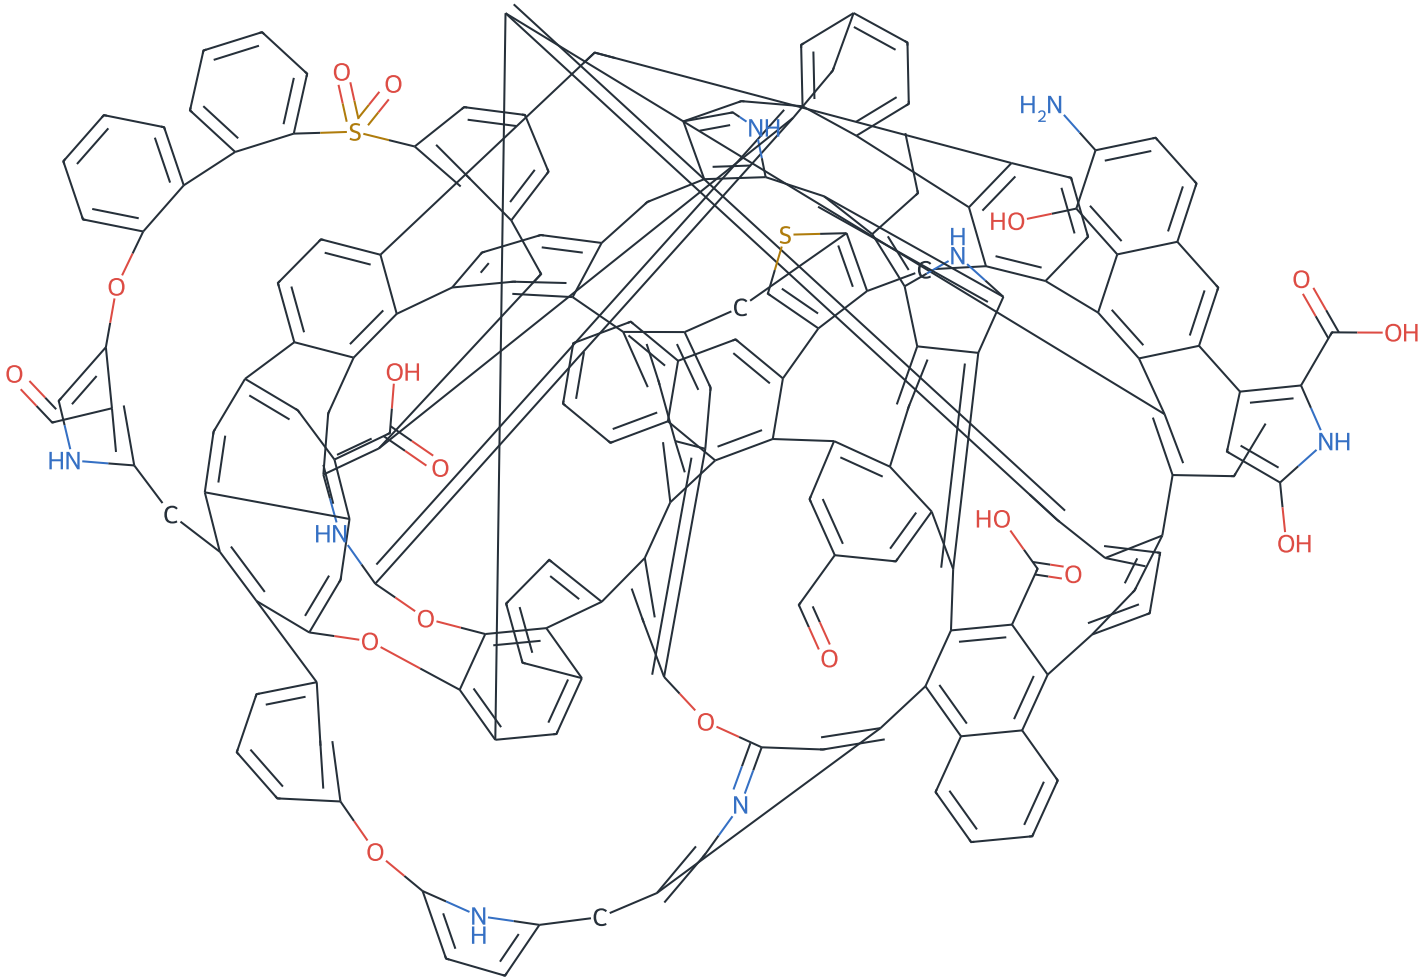

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-4 | complete candidate chemical graph

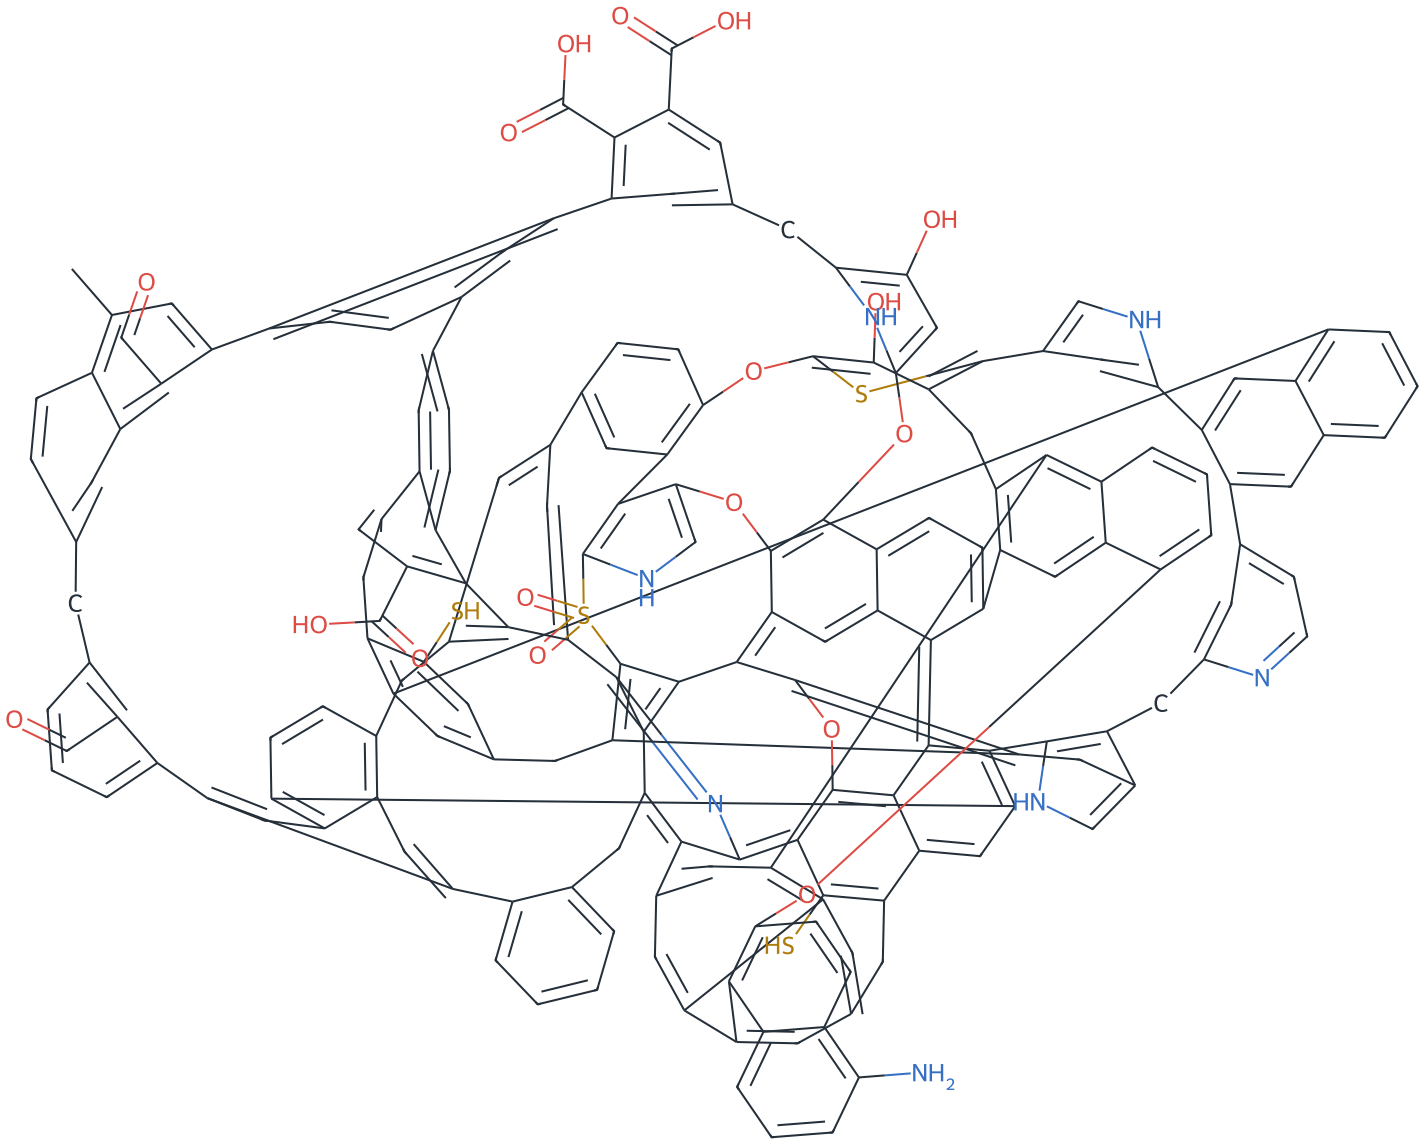

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-5 | complete candidate chemical graph

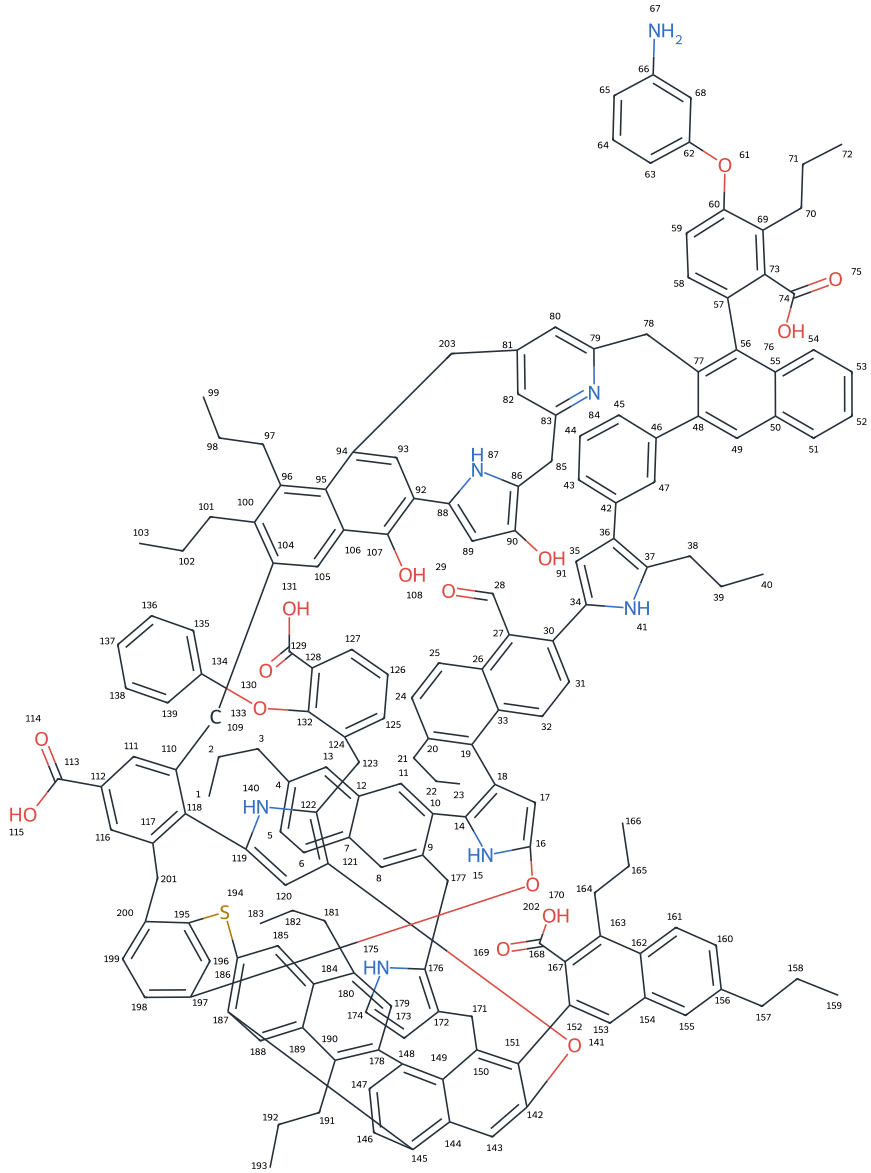

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-1 | SDF atom IDs

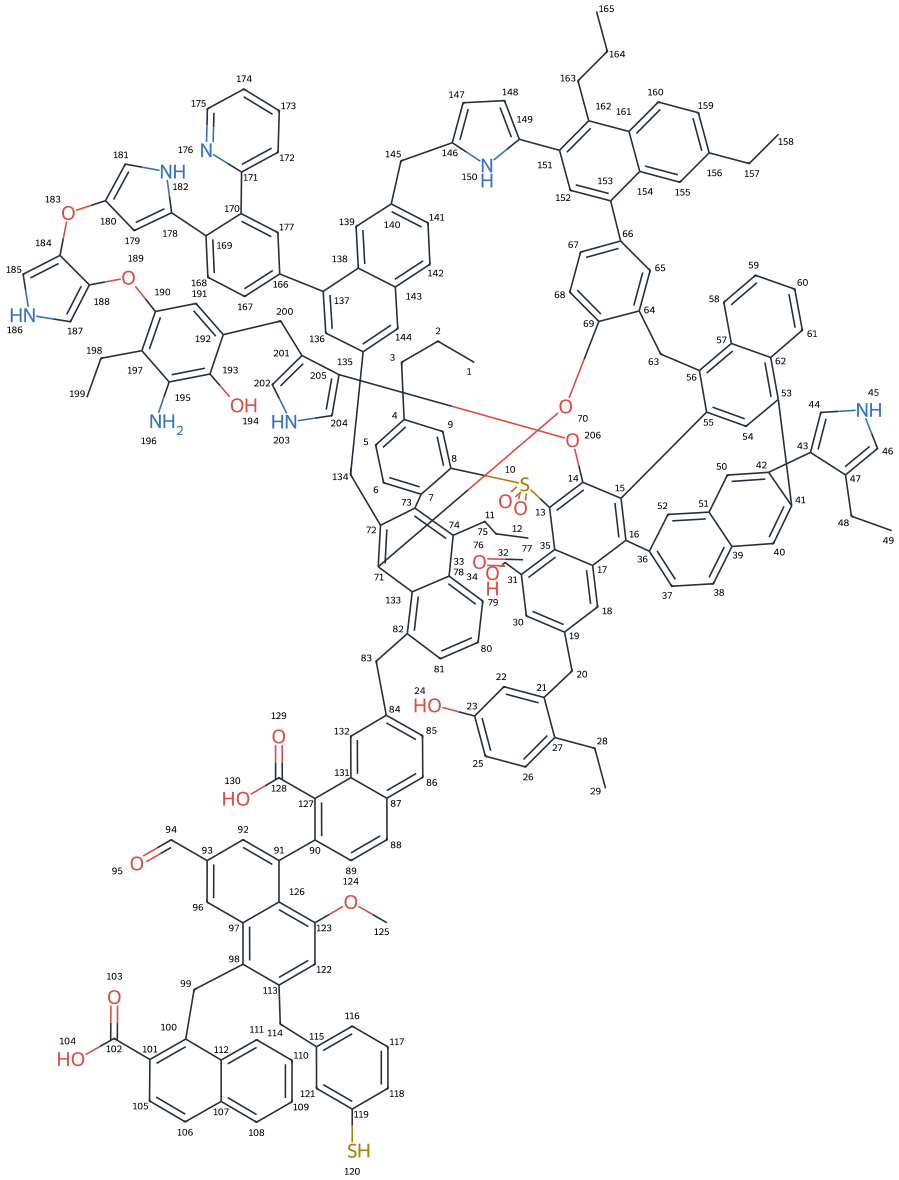

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-2 | SDF atom IDs

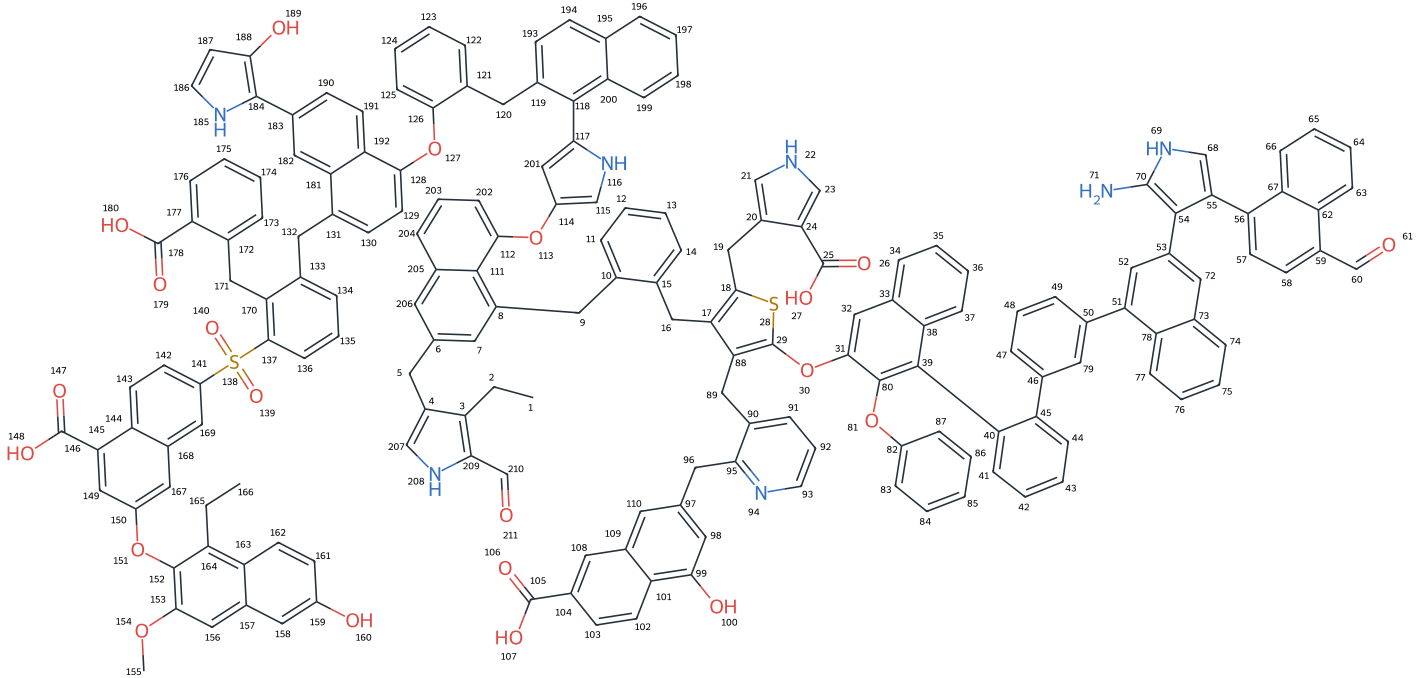

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-3 | SDF atom IDs

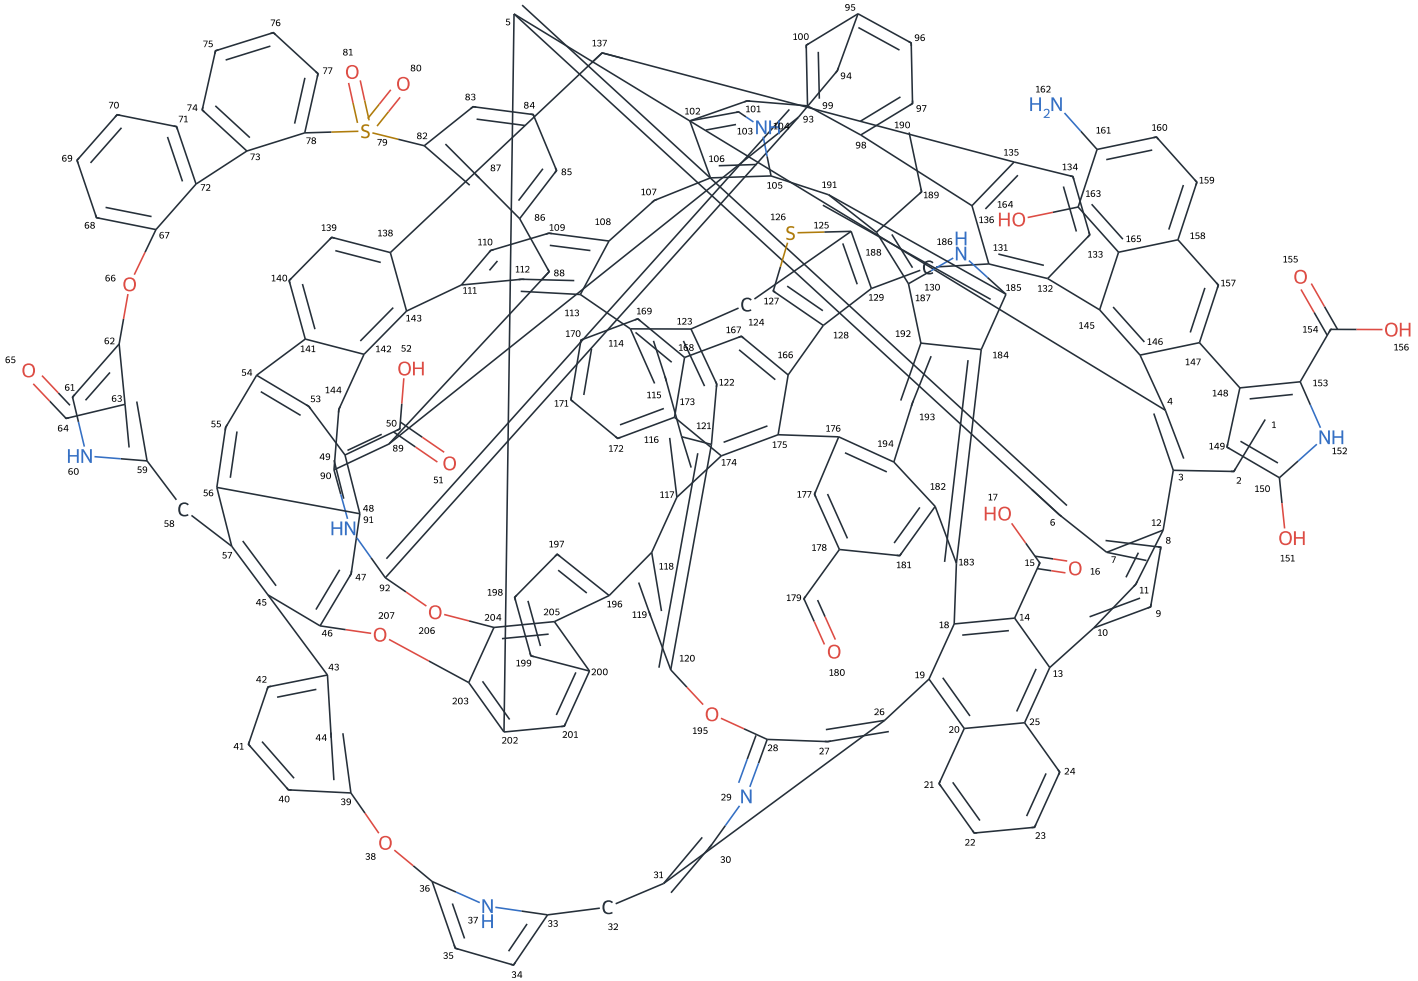

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-4 | SDF atom IDs

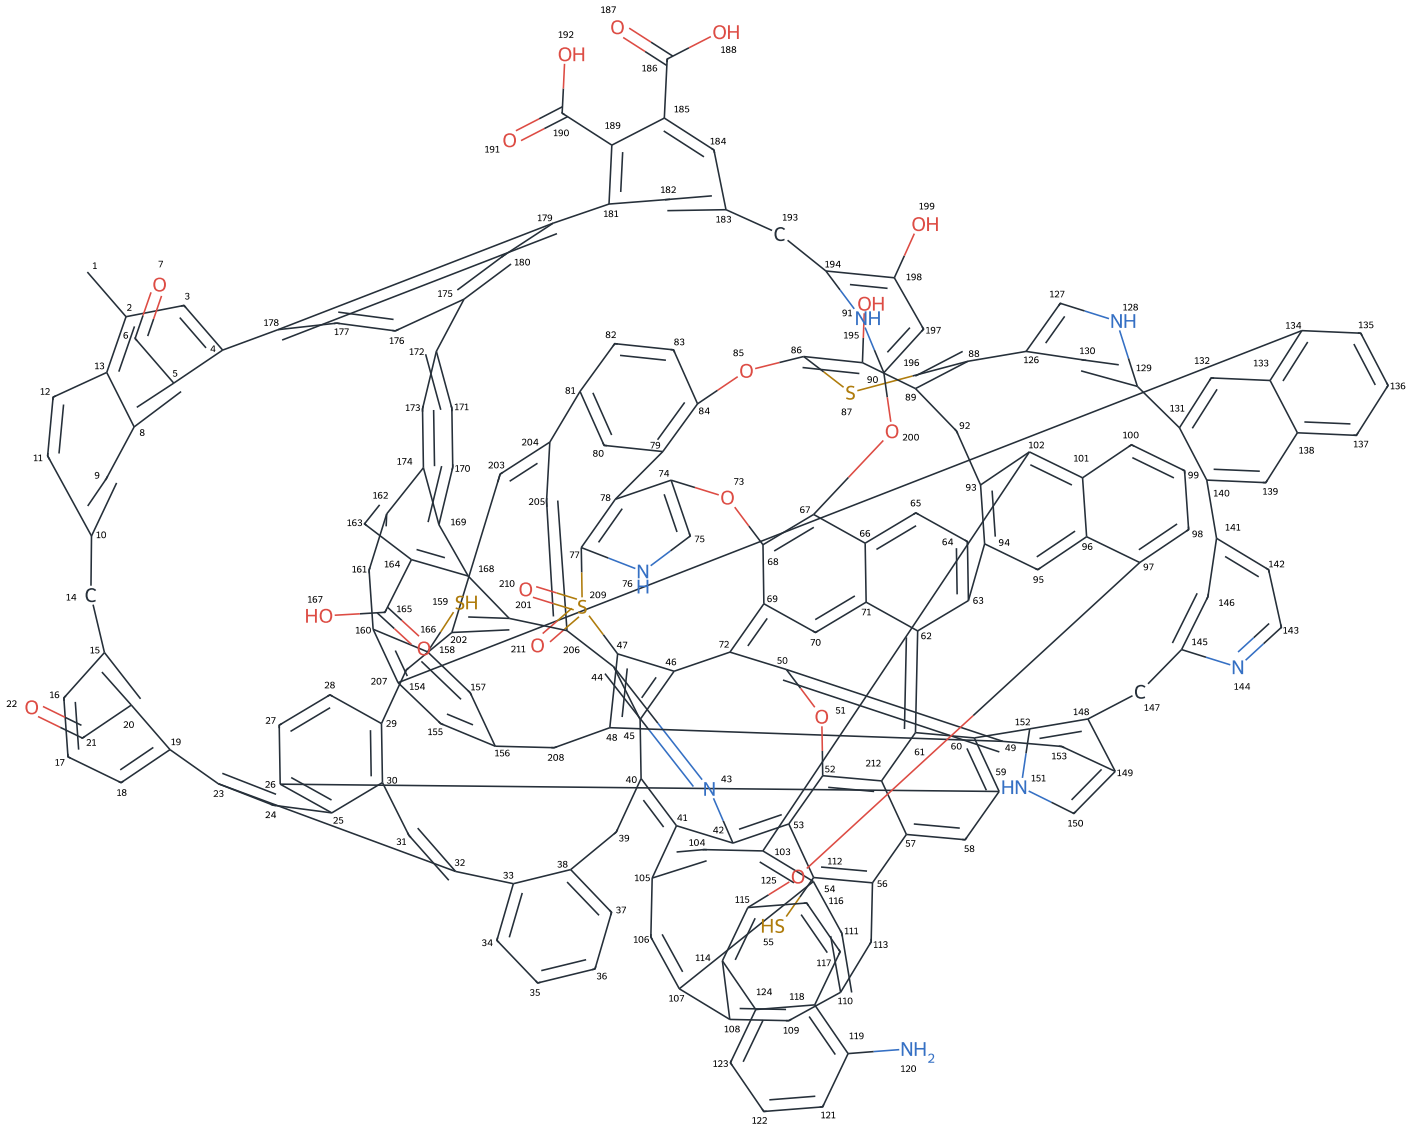

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.

Y21-5 | SDF atom IDs

Visualization preview. Same chemical graph as release v0.1.0; no unique experimental structure is implied.

Dense crosslinks remain in the full planar layout. Use the connection-indexed atlas to inspect local units.
